

## ANT-2xxx upgrade files

The upgrade file(s) are NOT located in this folder due to customers updating with the wrong file for the product or hardware revision of a product they have.

If you have no specific issues with the currently installed version of firmware then there is no reason to update.

To request an update file please provide the complete version information for the currently installed firmware in the product you have, then contact us on [support@antrica.com](mailto:support@antrica.com) or +44 1628 626098, during UK office hours

The current code in the encoder can only be upgraded to newer version of the same thread. If the details in the "code" column matches the current code in the encoder **and** the upgrade file name then that upgrade file can be used.

Model	code	encoding codecs
<b>ANT-200x</b>	V1 xxxxx_80_0_	H264
	V2 xxxxx_80_0_	H264
<b>ANT-220x</b>	V1 xxxxx_80_1_	H265/264
	V2 xxxxx_80_1_	H265/264
<b>ANT-2400x</b>	V1 xxxxx_k1_	H265/264
	V2 xxxxx_k1_	H265/264
<b>ANT-25xx</b>	V1 xxxxx_60_0_	H.264
	V2 xxxxx_60_0_	H.264
	V2 xxxxx_L60_0_	H.264
	v2 xxxxx_F60_1_	H265/264
	v4 xxxxx_F60_1_	H265/264

So, for example:

ANT-2000 with V1 xxxxx\_80\_0\_ **cannot** be upgraded to

- a) V2 xxxxx\_80\_0\_
- or
- b) V1 xxxxx\_80\_1\_

As a) is V2 and b) is for a different family of encoders, note the 80\_1\_ at the end.

ANT-2200 with V1 xxxxx\_80\_0\_ **can** only be upgraded to

- a) V1 xxxxx\_80\_0\_

As a) is V1 and b) is \_80\_0\_ which is for this family of encoders
