1. Prerequisites

1.1. ANT-36000 Firmware

The required firmware for the ANT-36000 is V4.512R01_T913. The download link is https://www.dropbox.com/s/nyukf3lu0x83pbz/ANT36000.V4.512R01-122909.tus and the file name is ANT36000.V4.512R01-122909.tus

This needs to be installed and once installed the ANT-36000 needs to be factory reset. These options are found under the System -> Upgrade&Reboot tab of the Web GUI

1.2. Android App

From the Google Play Store find download the "Antrica Remote". Below in Figure 1 is the app in the Google Play Store. This app is only available for Android.

Currently the App has been tested with Android versions 4.2.2 and 4.4.2.

2. Setup

2.1. ANT-36000

General ANT-36000 setup instructions, from the user guide, are available from the <u>Antrica</u> website or directly from

https://www.dropbox.com/s/pl5tb7cwmjnoneb/Decoder User Manual V1.pdf?dl=0

The specific setup for use with the "Antrica Remote" are: add the access URLs off the camera or other devices into the "Switching Decode List". The access URL window has a maximum of 58 characters. This is found under the Network -> "Decode List" tab of the Web GUI. The name in the "Name" column will appear in the App interface. See Figure 2 for example setup.

Note: the "switching Decode List Enable" do not requiring checking
