 - 5.1 ONVIF Support
 - 5.2 Other Information

ANT-35000A/A1 (3G HD-SDI HDMI & Composite) ANT-35000H/H1 (HDMI) HDMI only

Both models are identical except for the inputs they support Latest Firmware is identical for these models except older Firmware may not be compatible with A1 H1 models. <u>support@antrica.com</u> for details

1.What's in the Box

The ANT-35000 box contains

- ANT-35000 encoder
- -12 Volt Power converter (requires an IEC AC mains lead)
- -UK/EU/USA or China IEC 110/240v AC Lead (depending on your location)
- -Fixing brackets

2. Setting up the ANT-35000

Connect the ANT-35000 to a laptop or PC via an Ethernet switch using standard ethernet cables.

Connect the input Video source using an HDMI, HD-SDI or composite video cable (depending on model you have chosen, HDMI only for the H version).

Connect the 12 volt power input (or use PoE)and switch on.

The ANT-35000 will take approximately 2 minutes to boot up. You will see 4 LEDs.

On powering the Red power LED is ON, after boot up the Green Status LED will

flash. **The status of these LEDs is described in the table at the end of this guide** You are now ready to setup the ANT-35000 Encoder

3. Configuring the ANT-35000

The ANT-35000 default IP address is **192.168.10.100** . Please set the laptop/PC Ethernet IP address to be in the same sub-domain e.g **192.168.10.XXX** Open Internet Explorer or Chrome (this will allow video to be viewed) or other browser to just view settings and browse to **192.168.10.100** You will be asked to LOGIN: **User : admin , password: 1234 Please Note! There is a SETUP button top right in the first web page :Click**

3.1 Video Information

			2					_
								Ľ
Video&Audio	-	Video						
- Information			Enable	Algorithm	Resolution	Bitrate	Framerate	
- Encode		Primary Encoding	On	H.264	1920x1080	1719 (kbps)	24 (fps)	
- Audio		Secondary#1 Encoding	On	H.264	640x360	342 (kbps)	6 (tps)	
Output		Secondary#2 Encoding	Off	N/A	N/A	0 (kbps)	0 (fps)	
👔 Image	+	Secondary#3 Encoding	Off	N/A	N/A	0 (kbps)	0 (tps)	
Network	+	2000						
Event	+						Primary Secondary#1	
Becord	+	1500					Secondary#2	
Device	+						Secondary#3	
📩 PTZ	+	\ A	Λ	Λ	\wedge /	\land	\wedge / \vee	
😢 User	+		\sim			\bigcup	N	
🕞 System	+		~					

The Video Information page shows if a valid video signal is connected and gives information about the stream settings. Note: To view Video in a Browser, Google Chrome requires a plugin and the old internet explorer uses an Active X plug in. These will only load if the browser can access the internet.

3.2 Video Encode: Settings

3.3 Network- IP & Port:

This section allows you set the encoder IP address and other network items

5	Video&Audio	+	Local		
	Image	+	IP .od	e Fixed IP v	
- 92	Network	-	cal II	P 192.168.0.100	Notwork
	IP&Port		Local (atewa	y 192.168.0.1	Sottinge
	 Discovery 		Local ubne	at 355.255.255.0	Settings
	One-way			<u>N</u>	
	 SNMP 		DNS		
	· DDNS			Obtain DNS server address automatically	
	IP filtering			\odot Use the following DNS server addresses	
	E-mail		Primary DNS Serve	r 0.0.0.0	
	ETD				

4.Streaming :

This section explains how to stream the following formats to VLC player as an example player. Settings may vary with other players

4.1 RTSP over TCP to VLC player:

RTSP streaming only requires one setting to be changed in the ANT-35000. This is the RTSP port which can be found under Network-IP&Port. By default this Port 554

Port		
Base Port	2222	(1025~65535)
HTTP Port	80	(80, 1025~65535)
HTTPS Port	443	(443, 1025~65535)
RTSP Port	554	(554, 1025~65535)

The ANT-35000 RTSP URL is as follows:

rtsp://<IP ADDRESS>:<PORT>/video1 (video only streaming of primary stream) rtsp://<IP ADDRESS>:<PORT>/video1s (video only streaming of 2nd stream) rtsp://<IP ADDRESS>:<PORT>/video1s1 (video only streaming of 3rd stream) rtsp://<IP ADDRESS>:<PORT>/video1s2 (video only streaming of 4th stream) Port is 554 in this case

If audio is required the URL adds +audio1 (audio1s or audio1s1 or audio1s2)

e.g rtsp://user:password@<IP ADDRESS>:<PORT>/video1s1+audio1s1 (video + audio streaming of third stream) the audio URL extension always follows the video URL . User:password@ use if authenticated (remove if not authenticated)

Primary 2nd, 3rd and 4th steams are setup in the Video Encode section.

4.1.1 How to Configure VLC Player

Open VLC player and select FILE / OPEN NETWORK . Note the input windows in VLC may vary depending on which operating system you are running VLC on. This example is the MAC OS X Version of VLC player. Type in the RTSP URL with Port number as shown in this example: https://192.168.10.100:554/video1+audio1 Click OPEN...you should see the video stream displayed If a user name and password box pops up the RTSP is Authenticated and needs user and password. To add user name and user password in the RTSP URL please enter this URL in VLC player : rtsp://username:password@<IP address>:<port>/ video1

NOTE! In advanced settings you will find VLC has a default buffer setting of 1000mS this can be lowered to reduce latency to

around 100-200mS

4.2 MPEG Transport Stream over UDP

To stream MPEG TS first we need to setup ONE WAY STREAMING in the ANT-35000 which can be found under NETWORK-One way streaming.

	File	Disc	Network	Capture	
URL rtsp://62.31	1.33.140:	554/vide	eo1+audio1		
		Open R	TP/UDP Str	eam	
· Media Resource Loca	tor (MRL)	Open R	RTP/UDP Str	am	
Media Resource Loca Streaming/Saving:	tor (MRL)	Open R	TP/UDP Str	eam	
Media Resource Loca Streaming/Saving:	tor (MRL)	Open R	RTP/UDP Str	eam	Setting

Select MPEG TS and click Apply . Here you can select and Enable any or all of the 4 streams. There are two settings:

IP Address: This is either the destination Unicast IP address of the computer on which VLC is running or the multicast IP address you wish to use.

Port: This is the port you wish to use for streaming

						Live
Video&Audio	+	One-way Streaming				
😭 Image	+	Mode MP	EG-TS	Ŧ		
1 Network	-		Enable	Destination IP	Destination Port	
IP&Port		Primary	•	91.212.93.55	1935	1
- QoS		Secondary#1			0	j
. Discovery		Secondary#2	0		0	
One-way		Secondary#3			(o	
 SNMP 					Apply	

Note! If you want to stream MPEG-TS over the internet you must use the single Public IP address of the building in which the computer, running VLC, is located. The Router in this building will need to PORT FORWARD this stream(port number chosen above) to the internal IP address of the computer. Further data on Port Forwarding and Router setup contact <u>support@antrica.com</u>. Multicast is not supported over the Internet.

4.2.1 Open an MPEG-TS stream in VLC

Open VLC and open File/Network Please note the unicast URL has no IP in it.

Open Source	Open Source
File Disc Network Capture	File Disc Network Capture
URL udp://@:1935 To Open a usual network stream (HTTP, RTSP, RTMP, MMS, FTP, etc.), just enter the URL in the field above. If you want to open a RTP or UDP stream, press the button below. Open RTP/UDP Stream	URL udp://@227.2.2.7:1935 To Open a usual network stream (HTTP, RTSP, RTMP, MMS, FTP, etc.), just enter the URL the field above. If you want to open a RTP or UDP stream, press the button below. Open RTP/UDP Stream
Media Resource Locator (MRL) udp://@:1935	▼ Media Resource Locator (MRL) udp://@227.2.2.7:1935
✓ Streaming/Saving: Settings Cancel Open	Streaming/Saving: Setting: Cancel Oper

Example URL for MPEG Transport Stream

udp://@:1234 (unicast)

udp://@227.2.2.7:1234 (Multicast)

4.3 Open an RTMP stream

To stream RTMP you will need to know two pieces of information:

RTMP URL : example rtmp://wowza.antrica.com:1935/live/

Stream Name: streamdemo

Complete URL would then be

rtmp://wowza.antrica.com:1935/live/streamdemo

Examples of players will be WOWZA media server or Youtube live streaming . Both of these players can be setup to generate the full URL Full URL= [Primary server URL:Port]/[Stream name]

5.0 Help and Further Support

5.1 ONVIF Support

The ANT-35000 series supports ONVIF profile S+G and uses port 80 as standard and login user name and password (admin: 1234). Profiles are as defined in the 4 stream settings in section 3.2 of this Quick Start Guide.

5.2 Other Information

Please visit our website <u>www.antrica.com</u> and browse to the product page (e.g ANT-35000) where you can find a DOWNLOADS SECTION :

- application notes
- Full User manuals
- FAQs
- Firmware
- Other useful information
- More help Open up a Technical Support Ticket from the support page.

LED Status Indicators

LED	State	Description
DWD	Off	Power off
PWK	Red	Power on
	Green blinking	Normally operating
	Red	System failure: Needs diagnostics
	Constant change of colors	NTSC/PAL setting does not match
	between Red and Green	with input video signal
	Red blinking	Failed to obtain IP address in DHCP
		mode
STATUS	Constant change of colors	Failed to register on DDNS server
31/103	between Green blinking 2	
	times and Red blinking once	
	Green blinking, Red blinks	Video loss in Encoder system
	once every 5 seconds	
	Constant change of colors :	Formatting USB storage device
	Green, Orange, Red color in	
	turn	
	Off	No connection to remote system
	Green	Connected to a remote system
LINK	Red blinking	Decoder only: trying to connect to
LINK		an Encoder
	Orange	Illegal connection (unsupported
		combination of system modes)
	Green	Data transmission in progress
DATA	Red	Data loss
	Off	No data transmission
