Specification

ANT-1776UAVC-HDMI Standard HDMI Connector on Ribbon Cable

The ANT-1776UAVC-HDMI is an extension cable used with the ANT-1776UAV main board to support HDMI inputs.

This cable consists of a Hirose multi way ribbon cable connected to a small mezzanine board with a full sized HDMI input connector.

Insulated multi-core electrical cable for voltages not exceeding 80V.

Flat cable length : 5cm

Connector Type: J20 to board - FH28D-20S

Cable Type: 20 wire Hirose ribbon cable

Standard HDMI input mezzanine PCB board and fly ribbon cable to interconnect with ANT-1776UAV Main Board to enable HDMI input to be connected.
