

Right-click on the Maris Player desktop shortcut and select "Properties"

In "Target" text box, you can add parameters like URL, position, window size, etc..
Need a space between parameters.

Example of parameters:

- **TS** -----
- url ts://@:1234
- url ts://@224.0.0.1:1234
- rec d:/records/myfiles.ts
- **rtsp** -----
- url rtsp-
- udp://@192.168.0.10:554/mux1.sdp
- ***window size** -----
- size 500x500
- ***window position (x,y)** -----
- pos 20,40

****This parameters appears from maris_install_3.7.6 version***
